

# MODERN CHEMICAL CO.,LTD.

## Business Overview

The company is a distributor and an innovative service provider of extensive range of general and specialty chemicals and solvents used in diverse industries. The company has received a highly regarded for a reliable and quality suppliers and services from many decades of experiences in the market, long-term close relationship with customers; and thus good understanding of customer needs.

## Extensive Network

Through experiences over 40 years since 1971 in the solvent distribution business.

- Assured quality and security in solvent supplies via 300 leading suppliers around the world.
- Active with many thousands customers in multiple industries.
- Direct sourcing from domestic and international manufacturers with expertise in chemistry, the company can efficiently secure supplies and create customized compound and deliver the high quality products to customers.

# Products

Over 1,000 chemicals and solvents used in a wide range of industries such as Plastic & Additives, Gasoline, Rubber, Packaging, Textile, Parts & Automotive, Steel Work, High-Tech Industries, Adhesives, Waste Water Treatment, and etc. The company maintains high level of quality control and quality assessment to ensure that dependable and superior raw materials and products finally delivered to the customers. Supplies and products will be tested in the laboratory to control quality before passing to customers.

## ALCOHOLS

- Benzyl Alcohol
- Denatured Ethanol 100 (DEB100)
- Denatured Ethanol 95 (DEB95)
- Isobutanol (IBA)
- Isopropanol (IPA)
- Methanol
- N-butanol (N-BU)
- N-propanol (NPA)

## ESTERS

- Butyl Acetate (BA, BAC)
- Cellosolve Acetate (CA, EGA)
- Ethyl Acetate (EAC)
- Isobutyl Acetate (IBAC)
- Methyl Acetate (MA)
- N-propyl Acetate (NPAC)
- Sec-Butyl Acetate (SBAC)

## GLYCOL-ETHERS

- Butyl Carbitol (B-Car)
- Butyl Cellosolve (BC, BCS, BGE)
- Cellosolve Solvent (CS, EGE)
- Dipropylene Glycol Methyl Ether (DPM)
- PM Solvent (PM)
- PMA Solvent (PMA)

## GLYCOLS

- Diethylene Glycol (DEG)
- Dipropylene Glycol (DPG)
- Ethylene Glycol (MEG, EG)
- Polyethylene Glycol 400 (PEG 400)
- Propylene Glycol (MPG, PG)

## KETONES

- Acetone
- Cyclohexanone (CYC)
- Diacetone Alcohol (DAA)
- Diisobutyl Ketone (DIBK)
- Isophorone
- Methyl Ethyl Ketone (MEK)
- Methyl Isobutyl Ketone (MIBK)

## CHLORINATED SOLVENT

- 1, 1, 1, 2-Trichloroethylene (1, 1, 1, 2-TCE)
- Methylene Chloride (MC)
- Perchloroethylene (PCE)

## PLASTICIZERS

- Dibutyl Phthalate (DBP)
- Diisononyl Phthalate (DINP)
- Dioctyl Adipate (DOA)
- Dioctyl Phthalate (DOP)

## HYDROCARBONS

- Cyclohexane
- Heptane
- Hexane
- Ipsol 100
- Ipsol 150
- Isopar H Fluid
- Kerosene
- Solvent 1425
- Solvent 3040
- Solvent D40
- Solvent D80
- Solvent D110
- Toluene
- Xylene (Mixed)
- Methylcyclohexane (MCH)

## OTHERS

- Diethanolamine (DEA)
- Linseed Oil
- N-Methyl-2-Pyrrolidone (NMP)
- Silicone Emulsion
- Styrene Monomer (SM)
- Thinner
- White Oil
- Glycerine
- Monoethanolamine (MEA)
- N, N-Dimethylformamide (DMF)
- Silicone Oil
- Tetrahydrofuran (THF)
- Triethanolamine (TEA)

# Services

Being well-featured with both equipment and experiences together with in-depth knowledge and understanding on industry and clients' needs, allow the company to efficiently provide full range of services from large to small customers. Those key services include.

- **Comprehensive chemical and solvent supply chain management** - Capability to manage supply from suppliers to customers with integrated distribution infrastructure & facility and with exclusive products & premium services.
- **Logistics** - Door-to-door delivery for both large and small quantities of chemicals to customers to support their inventory managements.
- **Repacking** - Ability to provide repacking services to support large and small quantity as per customers' requirement.
- **Warehouse services** - Capability to store and stock products for customers and provide stock management for daily delivery to a long term delivery.
- **Chemical laboratory** - Well equipped chemical laboratory and experienced chemists; thus possess in-depth knowledge and understanding to assist the customers in developing innovative compound, lab testing services, and pragmatically commercializing the products.

- **Customized products** - Ability to tailor, blend and adjust products to customer's specific needs supported by well equipped with extensive knowledge and experiences.
- **Sourcing** - With extensive connection with suppliers; thus, possess capability to secure products from around the world for customers
- **Waste management services** - Ability to assist customers in reducing, eliminating, or managing hazardous chemical wastes.
- **Legal licenses and permits** - Ability to assist customers in acquiring government licenses and specific permits.
